ABSTRACT

RAMANDA. Organic Solidarity in Relationships among Groups on Jalur Port in Sungaiselan (supervised by Bustami Rahman and Ibrahim).

This research raises the theme of organic solidarity among groups on Jalur Port in Sungaiselan. The purpose of this study is to identify the forms of solidarity applied, and to identify factors underlying the emergence of such solidarity. Type and approach of this research was descriptive qualitative research using data collection methods such as observation, interviews with 10 informants and documentation. The theory used in assessing the activity of Jalur Port was the social solidarity of Durkheim's theory that explained that social solidarity was divided into two categories, namely mechanical and organic solidarity. Mechanical solidarity was collective consciousness. While in organic solidarity, heterogeneity and individuality were higher. The Durkheim's theory on social solidarity among groups was used to analyze the role in the activity of Jalur Port. The research found that the activity occurred in Jalur Port led to organic solidarity as any act of coercion, lack of awareness of individuals, and their flexibility in the relationship because of the closeness of the relationship based on objective material as the money, not based on emotional. While the factors that influenced the emergence of organic solidarity in the activities of Jalur Port were interaction, heterogeneity, division of labor and interdependence that affected the occurrence of organic solidarity in the activity of Jalur Port in Sungaiselan.

Keywords: Jalur Port, Mechanical and organic solidarity.
