

SYMPOSIUM VENUE MAPS

Royal Botanic Garden Edinburgh Exploring and explaining the world of plants for a better future Welcome to

SCIENTIFIC PROGRAMME

Presentations

The conference will be using MS PowerPoint in all venues. All delegates must submit their presentation to the Registration Desk. For morning presentations, these should be submitted to the Registration Desk by 08:15 at the latest. For afternoon presentations, these should be submitted by the start of the lunch break. Please make sure that the number of your talk (given to you when you submitted your abstract to Easychair) is included in the file name.

All submitted paper presentations are of 15 minutes' duration with 5 minutes for discussion. Please keep to this time so that delegates can move between parallel sessions. Chairpersons have been instructed to interrupt presentations that exceed their time limit.

Instructions for operation of the equipment will be given before each session. Please arrive at your session at least 15 minutes before your session starts.

Posters

Poster boards are available in the Fletcher Building. Please place your poster next to the number allocated to you when you submitted your abstract to Easychair. Pins and Velcro tape will be available to help secure the posters. There is a formal poster session on Tuesday afternoon, but we encourage all posters to be placed on the display boards at the start of the symposium. At the formal poster session we expect authors to be standing next to their posters.

New Publications

Before the poster session on Tuesday afternoon there will be a series of short presentations by several authors who have published new books since the last Flora Malesiana Symposium.

Impromptu meetings

The Board Room will be available to delegates for impromptu meetings. To arrange use of this room please contact the Registration Desk.

Herbarium access during the Symposium

Our Herbarium is available for consulting specimens during the symposium. Access is by arrangement at the Registration Desk and Herbarium staff will be available every half hour at the desk to escort delegates to the collections. You will be asked to complete a form giving your name and institute details, your area of interest and also an example of your handwriting for any determination slips you complete. The Herbarium will be open from 08:30 to 17:00 each day of the symposium.

Speed-detting sessions

Each morning images of some unidentified herbarium specimens will be shown to delegates in the lecture theatre. If you want to have a go at trying to identify these, then let the Herbarium staff know and they will direct you to the area where they have been laid out for consultation.

Library access

Delegates are welcome to use the Library for reference purposes during opening hours (Monday to Friday, from 10:00 to 16:00). Please ring the doorbell at the Library entrance for access. If additional access is required please contact the Reception Desk with details of times and materials required; requests will be passed to the Head of Library and Archives (Lorna Mitchell) for consideration.

Glasshouse access

Delegates are exempt from the usual £5.50 charge for access to the public glasshouses when wearing their conference badge.

WELCOME MESSAGE

On behalf of the organising committee it is my great pleasure to welcome you to Edinburgh, the Royal Botanic Garden Edinburgh and the 10th International Flora Malesiana Symposium.

This year's symposium brings together taxonomists, horticulturists and conservationists from across the world to discuss their research and conservation activities on the plant diversity of the Malesian region.

The theme of this year's symposium is 'Classify, Cultivate, Conserve'. At the heart of the symposium is the taxonomic research which underpins all biodiversity research, in particular publications that document and help us better understand the massive diversity of the region. In this symposium we also want to highlight and celebrate the role that horticulture has had in helping us understand this diversity and how it contributes to conservation actions.

We hope that by bringing taxonomists, horticulturists and conservationists together in a single symposium, we will better understand the needs of each other and how to be more efficient and effective in helping describe and protect the plant diversity of the region.

The symposium is about bringing people together who are passionate about Malesian plants, and about inspiring them to go forward to develop and deliver new and exciting research and conservation projects. It is also about meeting old friends and making new ones. We hope that the scientific and social programme we have put together will encourage you to do both.

Finally I would like to thank the Directors of the Royal Botanic Garden for supporting the symposium, the organising committee for their hard work over the past 6 months for making the symposium possible and all delegates for submitting a great range of talks and posters, which we are sure will make for a fantastic symposium.

Dr Peter Wilkie

Chairperson of the 10th International Flora Malesiana Symposium

Royal Botanic Garden Edinburgh

Session 6B

-				-	To Charles
1.0	nte	rer	ICP.	Ro	mo

	Session 6B. Beyond Red Listing
14.00-14.20	D. Gill et al.: Steps after Red Listing: how can we prioritise and take action for the region's most threatened trees? (119)
14.20-14.40	Kusumadewi Yulita et al.: Strategic conservation plan and action for the most threatened tree species in Indonesia (104)
14.40-15.00	Leng Guan Saw et al.: Beyond Red Listing: Implementation of action plans for the conservation of threatened plants in Peninsular Malaysia (132)
15.00-15.20	Discussion

Workshop 2

Lecture Room 1

14.00-15.40 Workshop 2: Nomenclature Helpdesk

Session 7A

Fletcher Building

Session: 7A. New Books & Poster Viewing

16.10-16.40	Book Launch
16.40-17.30	Poster Session

Symposium Dinner

City Chambers

19.00-23.30 Symposium Dinner species in the region is a major challenge, requiring not only an understanding of the species threat status, but also an understanding of the level and type of conservation required and the social, cultural and ecological values attached to different tree species. This presentation provides an introduction to a session focused on the challenges and opportunities behind prioritisation and follow-on conservation action for the region's most threatened tree species. The session will include three presentations covering different prioritisation methods and approaches to tree conservation from Indonesia, Malaysia and the Philippines. It will conclude with an open discussion on ways forward for the conservation of the region's threatened trees, with reference to the Global Trees Campaign, a partnership between Fauna & Flora International and Botanic Gardens Conservation International which aims to prevent tree species extinctions in the wild.

120. The flora in Javanese culture

Author(s): Eddy Nurtjahya Budi Hartono, Joko Wantoro and Fx Paula Era Linahadomi

Abstract Type: Poster

Various plant species which are part of the life cycle of the Javanese of two provinces, namely Central Java and Yogyakarta are studied. To collect information relating to floral diversity in the daily life of nearly 35 million people in these provinces, a literature review was conducted. School curricula for elementary schools, junior high school and senior high school, and Javanese language supplements including song and traditional game books were sampled. At least 90 species of nearly 49 families, all terrestrial species, were recorded. As many as 45 species have local names for their flowers, 31 species for leaves, 13 species for young fruits, and 17 species for seed.

121. An update on the banana family (Musaceae) in the Flora of Thailand

Author(s): Sasivimon Swangpol and Wandee Inta

Abstract Type: Presentation

Collecting expeditions by N.W. Simmonds in the 1950s shed light on the diversity of bananas throughout the tropics. Thailand, among the major 'hotspots', is at the centre of origin of the banana family, Musaceae. From a total of 74–78 species and three genera in the world, 10–16 species found in Thailand belong to two native genera; *Musa* and *Ensete*. One ornamental species in *Musella* has been introduced into the country. Apart from two new native *Musa* species found in Thailand and published by our team in 2011 and 2015, a number of putative taxa await study and description. Several approaches have been used including morphometrics; anatomy by light and scanning electron microscopes; palynology; analyses of genome sizes, and molecular biology. A revision of the family is being prepared for the Flora of Thailand project. Our conclusions on banana taxonomy mark the importance of fertile land as a cradle of endangered bananas and urge conservation of their fragile germplasm and natural habitats.

122. Balinese home gardens based on the 'Tri Hita Karana' concept in Pakraman villages, Buleleng Regency, North Bali

Author(s): I Gusti Ayu Rai Sawitri, Nisyawati and Eko Baroto Walujo

Abstract Type: Poster

Home gardens in the Pakraman villages in Bali are based on 'Tri Hita Karana' concept which manages and regulates the garden space into Parahyangan, Pawongan and Palemahan zones, each with its own plants species. This study aimed to explore the diversity of plants species and compile information about their potential use. The location of the study includes 52 gardens in 41 Pakraman villages from the lowlands to the highlands in Buleleng regency north Bali. Data were obtained through observation, semi-structured interview (individual and group discussions) and questionnaires. The results revealed some specific plants species in each zone, such as Michelia alba, Michelia champaca, Plumeria acuminata in the Parahyangan zone which is used for ritual and Balinese Hindu ceremonial plants. Plants species in the Pawongan zone such as Schefflera arboricola, Phyllanthus
