### **The Influence of Retailing Mix to Customer Loyalty of Ramayana Department Store Pangkalpinang.**

The increasing of retail business in Pangkalpinang nowadays make ramayana department store Pangkalpinang facing some competitors in the business. This research aims at studying the influence of retailing mix to customer loyalty. This research has six independent variables, they are product, price, location, presentation, and personnel which influence dependent variables; customer loyalty. A sample in this research is 100 respondents with non probability sampling technique and accidental sampling approach. The data used survey method by questionnaire. The data was analyzed by using double regression analysis covers validity test, reliability test, classical assumption test, double regression analysis, and hypothesis tested by t and f tests and determination coefficient analysis ( $R^2$ ). The analysis resulted equation as follow:

$$Y = 7,423 + 0,162 X_1 - 0,285 X_2 + 0,074 X_3 + 0,092 X_4 + 0,773 X_5 + 0,528 X_6$$

Product variable has influenced customer loyalty as 0,162, which followed by price variable 0,285, location variable is 0,074, promotion variable is 0,092, presentation variable is 0,773 and personnel variable is 0,528. Hypothesis test showed that the six independent variables has positive impact and significance to customer loyalty. Then, the result by using f test proves that the six variables has positive impact and significance to dependent variable. The determination coefficient ( $R^2$ ) showed that 63% variation of customer loyalty could be described by product, price, location, promotion, presentation and personnel. The rest 37% is described by other variables which beyond this research.

**Keywords :** Retailing mix, customer loyalty, independent variables, dependent variables
