Submission 88	
Title	Liquid Smoke Application in Lateks as an Environment Friendly Natural Coagulan
Full Paper:	(Sep 24, 04:17 GMT) (previous versions)
Author keywords	Coconut shell liquid smoke clotting time odor
Topics	
Abstract	Liquid smoke has many benefits, specifically in the food, fishery, wooden and plantation industries. In the food and fisheries industry, the basic principles of using liquid smoke are useful as a preservative or endurance enhancer, aroma and taste addition. In the wooden industry, liquid smoke is useful for termite attack resistance, while in the plantation industry, liquid smoke functions as a latex coagulant with liquid smoke functional properties such as antifungal, antibacterial and antioxidant properties that can improve the quality of the rubber products produced. Most of the rubber farmers in Bangka Belitung Province still use alum as a coagulant to coagulate their latex. However, the use of alum as a coagulant material can reduce the quality of the processed rubber material (bokar) that will be produced. The reason why farmers use alum is the lower raw material price, so the solution that must be resolved is how to get coagulant raw materials at low prices and not pollute the environment with a mild aroma / odor caused by the use of coagulant materials that are not

Abstract: Liquid smoke has many benefits, specifically in the food, fishery, wooden and plantation industries. In the food and fisheries industry, the basic principles of using liquid smoke are useful as a preservative or endurance enhancer, aroma and taste addition. In the wooden industry, liquid smoke is useful for termite attack resistance, while in the plantation industry, liquid smoke functions as a latex coagulant with liquid smoke functional properties such as antifungal, antibacterial and antioxidant properties that can improve the quality of the rubber products produced. Most of the rubber farmers in Bangka Belitung Province still use alum as a coagulant to coagulate their latex. However, the use of alum as a coagulant material can reduce the quality of the processed rubber material (bokar) that will be produced. The reason why farmers use alum is the lower raw material price, so the solution that must be resolved is how to get coagulant raw materials at low prices and not pollute the environment with a mild aroma / odor caused by the use of coagulant materials that are not recommended (alum). This study aims to apply liquid smoke as a natural coagulant in freezing latex. The research method used a completely randomized design, with liquid smoke concentration and repeated 3 times. The parameters observed were the clotting speed and the organoleptic test for odor during 14 days of storage. The results showed that the best concentration of liquid smoke was 10% with no odor and 10 minutes of clotting time.

Dear Authors,

We would like to inform you that your paper is currently under review by reviewers. Announcement of acceptance of full paper on August 23-27 2021 through the author's easychair account or your mail.

Thank you for waiting and hopefully your paper can be accepted at our conference.

Sincerely yours,

Herman Aldila
Head of Committee

Dear author(s) of ICoGEE 2021,

It is with great pleasure to inform you that the conference program ICoGEE 2021 will be held on Wednesday, September 29th, 2021.

We've attached the event schedule, technical information, and a list of the parallel sessions to this message.

Access to the zoom meeting will be opened at 07.30 AM.
<https://bit.ly/ICoGEE21-01>
Meeting ID: 842 8168 8010
Passcode: icogee2021

Participant is required to register and rename the zoom account with format:
ClassCode_ID Paper_Name_Institution (Example: A001_RirinAmelia_UBB Indonesia)

Participants must use virtual background provided by the committee that can be downloaded at link https://bit.ly/VBG_ICoGEE_Participant

Dear authors

Along with this email, we attach your e-certificate as a presenter. We thank you for registering and participating in the 3rd International Conference on Green Energy and Environment (ICoGEE) organized by Faculty of Engineering, Universitas Bangka Belitung on September 29th-30th, 2021. We are beyond glad as this pandemic situation would not let your spirit down to keep participating in this conference. We wish to apology for all shortcomings in this conference and we do hope to see you on the 4th ICoGEE in a much better condition.

Sincerely yours,
Organizing Committee of ICoGEE 2021
Faculty of Engineering, Universitas Bangka Belitung
