*The Influence of Earning per Share (EPS), Price Earning Share (PER) and Devident per Share (DPS) on the Stock Price Listed in Indonesia Stock Exchange Period 2010-2014*

Lisnawati N.A. 3021211052.

**ABSTRACT**

*The purpose of this study is to analyze the factors affecting the company's stock price in the Indonesia Stock Market, especially in the banking sector. The variables used are Earning Per Share (EPS), Price Earning Ratio (PER), and Devident Per Share (DPS). The study also aims to prove that the Earning per Share (EPS), Price Earning Share (PER), and Devident per Share (DPS) have simultaneous and partial effects on stock price. This is a quantitative research with the population of all banking companies listed in Indonesia Stock Exchange (BEI) as many as 42 companies. The data is obtained through the website www.idx.co.id. This research uses purposive sampling technique by taking a sample of 10 (ten) companies that meet predetermined criteria. Multiple linear regressions analysis is used to show the effects of the Earning per Share (EPS), Price Earning Ratio (PER), and Devident per Share (DPS). Based on the research results and the author's discussion, it can be concluded that Earning Per Share (EPS) and Price Earning Ratio (PER) have significant, positive partial effect on stock prices, and Devident Per Share (DPS) have no significant effects on the price stock. Earning Per Share (EPS), Price Earning Ratio (PER), and Devident Per Share (DPS) simultaneously have significant positive effects on the stock price of banking companies listed in Indonesia Stock Exchange 2010-2014.*

**Keywords:** Earning per Share (EPS), Price
