Abstract – The palm oil industry in Bangka Belitung is not only prioritized as a contributor to community welfare but at this time no less important is the environmental aspect that must be applied in the supply chain of a company. Environmental aspects in practice tend not to be integrated into the supply chain of the company, so it runs less effectively. One way to integrate this aspect of the environment into the supply chain is green supply chain management (GSCM). The study was conducted to identify the GSCM of the
