Crossref indexation

This journal is indexed in Crossref.

The Crossref system is used for linking citations across publishers. To ensure **direct linking to and from its contents**, EDP Sciences registers its scientific research journals to Crossref. Online archives have also been indexed.

Any Crossref members can create direct links from its online references to the EDP Sciences contents, using Crossref database. Reciprocally, the online references of EDP Sciences articles include direct links to the cited articles. Such links can be created *on condition that* the reference of the cited article matches a Crossref data. In particular these direct links *only* concern references whose publishers have previously indexed their own data to Crossref.
